Examiner's statement of reasons for allowance

The following is an examiner's statement of reasons for allowance:

1. Claims 1,10,14,16,22, and 29 are allowed because prior art fails to teach a charged particle apparatus and method for manipulating charged particles, as recited in claims 1,10,14,16,22, and 29 that, includes operating a magnetic field generating apparatus having a magnetic-flux-carrying body made of a material with a high permeability number, wherein the permeability number of the material is temperature dependent, and the material and the operating temperature are chosen such that the operating temperature is within a temperature range, in which the following relationship applies:

$$(\mu_{\max} - \mu_{\min}) \div (\mu_{\max} \cdot \Delta T) = c < 3 \cdot 10^{-5} \text{ K}^{-1}$$

wherein the operating temperature is substantially a temperature at which the temperature dependency has the extremum.

2. Claims 6-8,11-13,17-21,25-27,30, and 31 are allowed by virtue of their dependency upon allowed claims 1,10,14,16,22, and 29.

3. The examiner agrees that the cited references teach away from the temperature dependency range above, as well as an operating temperature at the extremum of the temperature dependence of the materials permeability.

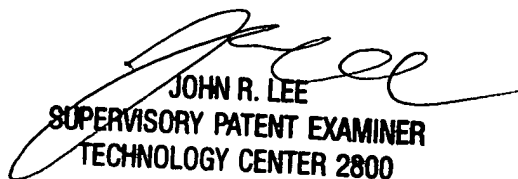

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications should be directed to Phillip Johnston whose telephone number is (571) 272-2475. The examiner can normally be reached on Monday-Friday from 7:30 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiners supervisor John Lee can be reached at (571) 272-2477. The fax phone number for the organization where the application or proceeding is assigned is 703 872 9306.
